

# CEEW Energy Access Dialogue

**21 February 2019 | Thursday**  
**1000 - 1200 hrs**

Sagarmāthā conference room, Council on Energy, Environment and Water,  
 Qutab Institutional Area, New Delhi

The Council on Energy, Environment and Water (CEEW) is pleased to invite you to the **CEEW Energy Access Dialogue**, a quarterly forum where researchers and practitioners discuss their ongoing work in energy access, deliberate on its implications, explore possibilities for collaborative work, and review immediate priorities in the energy access space.

The **first edition** will focus on two aspects of access to clean cooking energy. We will begin by discussing the pattern of household consumption of liquefied petroleum gas, based on an analysis of LPG sales data from distributorships in Karnataka. This session will aim to cover ground on the prevalence of fuel stacking in LPG-consuming households, and the difference in consumption between *Ujjwala*- and non-*Ujjwala*-households. In the following session, we will deliberate the extent of inclusion and exclusion of various social groups under the *Ujjwala Yojana*. Our attempt will be to intersect findings from CEEW's recent ACCESS study with the implementation guidelines of the scheme to identify procedural inequities and their impact on programmatic outcomes.

## Agenda

|             |   |
|-------------|---|
| 1000 – 1010 | Welcome address by Abhishek Jain, Senior Programme Lead, CEEW   |
| 1010 – 1025 | Presentation on 'Evaluation of India's ambitious cooking gas distribution programme using novel sales data' by Hisham Zeriffi, Associate Professor, Faculty of Forestry, University of British Columbia |
| 1025 – 1100 | Discussion  |
| 1100 – 1115 | Presentation on 'Evaluation of social inclusion in clean cooking energy policies' by Sasmita Patnaik, Programme Lead, CEEW  |
| 1115 – 1150 | Discussion  |
| 1150 – 1200 | Concluding remarks  |
