

Neeraj Kuldeep is a Programme Associate at the Council on Energy, Environment and Water (CEEW), where his research revolves around solar and wind markets and the socio-economic benefits of renewables, including jobs and skilling in the sector. He is particularly interested in the policy, regulatory and economic aspects of rooftop solar, and is currently leading a project to design new business models to accelerate the deployment of rooftop solar in the Delhi region.

Neeraj also works on energy storage technologies, electric vehicles and grid integration, and often cross-pollinates ideas and analysis with other teams on subjects like the assessment of the criticality of battery minerals in India.

At The Council, he has worked and published extensively on the impact of the Goods and Services Tax (GST), skill gaps in the solar and wind energy sectors, wind deployment scenarios, assessing the employment potential in the renewable energy market, applications and economics of energy storage technologies, and long term assessments of grid electricity tariffs and alternates to the grid for commercial and industrial consumers.

Neeraj holds an undergraduate degree in Energy Science and Engineering, and an M. Tech in Energy Systems from the Indian Institute of Technology (IIT), Bombay.
