

Sachin provides complete on-site support for network planning, administration and troubleshooting, computer system installation, hardware purchase, and IT inventory management. He has over five years of experience in this field and brings with him a wide range of technical expertise.

During The Council's transition to the new office space, Sachin played an efficient role in planning for the new office network, executing the network configuration, identifying and correcting problems with networks on real-time basis, configuring firewall for maximum security and flexibility, drafting IT policy and procedures, and tracking software usage and purchase. He also assists the staff with various computer-related queries to ensure smooth day-to-day operation of the facility.

Prior to joining The Council, Sachin worked with SecureLynkx Networks and Country Inn and Suites by Carlson.

He holds an undergraduate degree in Computer Applications from the Indira Gandhi National Open University.
